The improvement comprises in combination with other recited elements, a chopper for modulating the terahertz output pulses by alternately transmitting and reflecting the pulses at a first frequency, the chopper having a clock output and positioned between the transceiver and an object such that terahertz output pulses reflected by the chopper have a polarity opposite terahertz output pulses reflected by the object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
